Page 13 English Controlling the Keyboard Sounds E11 The transpose feature lets you change the

pitch, in semitone steps. Page 14 Controlling the Keyboard Sounds E12 You can use the Digital Keyboard to sample a sound from a portable audio player, or other device, and then play the sound with keyboard keys. For example, you could sample the bark of your dog and then use the sound in a melody. The keys to the left and right of C4 play the sound at different pitches. Page 16 Controlling the Keyboard Sounds E14 Use the following procedure to replace a percussive instrument with a sound you sampled and play auto accompaniment rhythms page E27 with the sampled sound. 1. Press 3 and 4 at the same time. The display will return to the previous screen if you do not perform the next step for some time. Page 17 English E15 Playing Builtin Songs With this Digital Keyboard, built in tune data is referred to as "songs". You can listen to the builtin songs for your own enjoyment, or you can play along with them for practice. Page 18 Playing Builtin Songs E16 3. Press bk. This starts playback of the song. 4. Press bk again to stop playback. Song playback will continue repeat until you press bk to stop it. You can cancel song repeat by pressing 6 "REPEAT" indicator disappears from the display. Page 19 English Playing Builtin Songs E17 3. When playback reaches the measure you want to select as the end measure, press 6 again. Page 20 Playing Builtin Songs E18 You can turn off the right hand part or the left hand part of a song during playback and practice playing the along with the remaining part. 1. Press bl to select the part you want to turn off. Each press of bl cycles through the settings shown below. Page 21 English E19 Using Builtin Songs to Master Keyboard Play To master a song, it is best to break it up into shorter parts phrases, master the phrases, and then put everything together.

Your Digital Keyboard comes with a Step Up Lesson feature that helps you to do just that. Page 22 Using Builtin Songs to Master Keyboard Play E20 The following are the messages that appear on the display during Step Lessons. First, select the song, phrase, and part you want to practice. 1. Select the song you want to practice page E15. This will select the first phrase of the song. Page 23 English Using Builtin Songs to Master Keyboard Play E21 Now it is time to start the lessons. First, select the song and part you want to practice. First, listen to the example a few times to familiarize yourself with what it sounds like. 1. Press br. Page 24 Using Builtin Songs to Master Keyboard Play E22 Though song playback stands by waiting for you to press the correct keys as in Lesson 2, the Digital Keyboard does not provide any guidance about what note you need to play next. Remember everything you have learned up to Lesson 2 as you play. Page 25 English Using Builtin Songs to Master Keyboard Play E23 Use the following procedure to turn off note guide, which sounds the note to be played next in Lesson 2 and Lesson 3. 1. Press 3 a number of times until "NoteGuide" appears on the display page E4 . Page 27 English E25 Music Challenge Keyboard Game Music Challenge is a game that measures your reaction speed as you press keys in response to on screen keyboard indicators and fingering guide indications. 1. Press cm. This causes a key on the onscreen keyboard to start to flash, and starts the Music Challenge song. After a short while, the playing time display changes to an evaluation result. To clear the evaluation result from the display, press bo, bp, or bq. Page 29 English E27 Using Auto Accompaniment With Auto Accompaniment, simply select an accompaniment pattern. Each time you play a chord with your left hand the appropriate accompaniment will play automatically. It's like having a personal backup group along with you wherever you go.

Page 30 Using Auto Accompaniment E28 Playing a chord with your left hand automatically adds bass and harmony accompaniment parts to the currently selected rhythm. It is just like having your own personal backup group on call. 1. Start play of the Auto Accompaniment rhythm part. Note that with some chords, even if you do not finger the third or fifth note, they will be played anyway. Page 34 E32 Connecting External Devices You can connect the Digital Keyboard to a computer and exchange MIDI data between them. You can send play data from the Digital Keyboard to music software running on your computer, or you can send MIDI data from your computer to the Digital Keyboard for playback. Page 37 English Connecting External Devices E35 This keyboard can be connected to commercially available stereo, amplifier, or recording equipment, to a portable audio

player or other equipment. Connection requires commercially available connecting cords, supplied by you. Use of unauthorized accessories creates the risk of fire, electric shock, and personal injury. These are "weld lines" that result from the plastic molding process. They are not cracks or scratches. Be especially careful when playing late at night to keep the volume at levels that do not disturb others. Other steps you can take when playing late at night are closing the window and using headphones. The page you are looking for might have been removed, had its name changed, or is temporarily unavailable. Internet Information Services IIS. The lack of an instruction or false information given to customer shall constitute grounds to apply for a complaint because of nonconformity of goods with the contract. In accordance with the law, a customer can receive an instruction in nonpaper form; lately graphic and electronic forms of the manuals, as well as instructional videos have been majorly used. A necessary precondition for this is the unmistakable, legible character of an instruction. Therefore, in an instruction of Casio CTK3000 one could find a process description. An instruction's purpose is to teach, to ease the startup and an item's use or performance of certain activities. A good user manual introduces us to a number of additional functionalities of the purchased item, and also helps us to avoid the formation of most of the defects. An instruction contains a number of clues concerning respective functionalities, safety rules, maintenance methods what means should be used, eventual defects of Casio CTK3000, and methods of problem resolution. Eventually, when one still can't find the answer to his problems, he will be directed to the Casio service.

Lately animated manuals and instructional videos are quite popular among customers. These kinds of user manuals are effective; they assure that a customer will familiarize himself with the whole

material, and won't skip complicated, technical information of Casio CTK3000. After a successful purchase of an item one should find a moment and get to know with every part of an instruction. Currently the manuals are carefully prearranged and translated, so they could be fully understood by its users. The manuals will serve as an informational aid. GShock is an abbreviation for Gravitational Shock. The watches in the GShock line are designed primarily for sports, military and outdoors-oriented activities; nearly all Gshocks are digital or a combination of analog and digital and have a stopwatch feature, countdown timer, electroluminescent backlight and 200 metres of water resistance. During a visit to a playground, Ibe discovered that in a rubber ball, the centre of the ball doesn't suffer the effects of the shock during a bounce on a rough surface which gave him the idea to implement that concept into the watch. Sales were sluggish in Japan as people preferred dress watches. In order to promote the GShock worldwide, the American division of Casio released a commercial in which an ice hockey player used the DW5000C as a hockey puck to demonstrate the toughness of the watch. The commercial gained negative publicity and Casio was accused of false advertising. A TV news channel then set out to conduct live tests on the DW5000C to check whether it was as tough and durable as advertised. This involved repeating the action shown in the commercial. The DW5000C survived the impact of the hockey stick, and the GShock gained popularity among the general public. The popularity of GShocks increased throughout the 1990s. Many newer models feature metal steel or titanium bands and a mix of analog/digital timekeeping, analog timekeeping or digital timekeeping.

New limited models are introduced more frequently through the year. Special models are released upon the anniversary celebration of the G Shock brand and are sold through selected retail channels. Ex Special Forces British SAS soldier Andy McNab mentions in several of his novels how his character Nick Stone relies on a GShock watch. According to Mark Bowden's book *Blackhawk Down*, the DELTA Operators wore GShock watches during the combat events of 3 and 4 October 1993. Some include Tough Solar battery charging and Multiband 6 time synchronisation through radio signals from six transmission stations worldwide. The MTGS1000, GWA1000, and GPW1000 feature Triple G Resist which includes resistance to shock, centrifugal gravity, and vibration. In 2014, Casio introduced the GPS Hybrid Wave Ceptor feature in the GPW1000 Gravitymaster that allows the watch to synchronize the time through GPS signals and also adjusts the time zone automatically. The GPRB1000 is a GPS Hybrid Wave Ceptor model which relies on GPS and atomic time keeping in order to keep perfect time. The model also has triple sensors altimeter, barometer and compass as well as a backtracking function which allows the user to return to the same point from where he started the journey by the use of a map, a function which was previously exclusive for Casio's ProTrek line of watches. The watch also features Bluetooth connectivity which allows it to connect to a smart phone via an app and allows it to upload log data in the phone, download map information from the phone and also synchronise itself with the phone in order to keep perfect time. The watch comes without a replaceable battery. The following is a list of the six atomic time transmitters. This is the newest additional signal; older multiband 5 watches will not be able to connect to this signal, and must be upgraded to a newer multiband 6 watch in order to synchronise from there. These models were the very first GShock watches to have a countdown timer.

The countdown timers on these models were designed to count down for surfing competitions, some of the later models have a yacht timer, moon and tide graphs so a surfer can keep track of the progress while competing on the water. Many of these models came equipped with a pair of strap adapters and a single one-piece resin or nylon band. Resin bands for these models had open gaps or slits through the band. Casio refers to them as drainage slits; the idea is that water will drain out with no problems while in action when surfing. Most of these series models had a translucent band. These models were branded as XTreme for the Japanese domestic market. They were designed for snowboarding and skateboarding competitors and competitions. The only difference is that these models came with nylon velcro bands. Retrieved 23 December 2019. By using this site, you agree to
