Control and Harness Diagram
Model # SP-1075/SP-575

IMPORTANT: In the off season remove control and put in a cool dry place. The interior summer temperatures could damage circuit board and void warranty.

IMPORTANT: Do not modify harness lengths. Any modifications will void warranty.

Special Notes:

1. All external connections must have dielectric grease.
2. Read lead labels before attaching to power source or ground.
3. No other devices may be spliced into wiring harness.
4. Any repairs to wiring harness must be done with heat shrink butt connectors.
5. If inline fuse is installed, use a 35 amp time delay type or a circuit breaker (575 and 1075).

Key	Part No.	Description	Qty.
1	D 6114	Wiring Harness - 24'	1
2	D 6230	1075/575 Variable Speed Controller	1
3	D 6124	Bracket Knob	2
4	D 6123	Controller Mounting Bracket	1

There is one on ebay local to me that Im thinking about. What do you think a reasonably nice used unit would be worth. Thanks, MichaelI believe they were discontinued about 4 or 5 years back. However collets and wheels should be still accessable. I use mine for regrinding alot of my drills. Realize your points wont be dead nuts on center. If you get good at sparking out you should get a point on center within.002. For general use youll like it. There seems to be no continuity of design from one to the next. Replacement parts are expensive, and not available for older models. Some models need expensive special grinding wheels. Maybe they will achieve perfection some day. The SP2500 is one of the discontinued models. It uses two wheels at one time. You can also get a pair of diamond wheels for carbide drills for the same price. So consider the condition of the wheels and whether there are missing parts before buying a used one. LarryIs there a better unit out there that I should look for. However if you look at the price per drill ground, it will pay for itself many times over. How long it will take depends on your usage. If you do buy one make sure the splitting tube is adjustable radially. The really old ones werent. It cost me a couple hundred to get updated. RosieWe use an SP2500 a lot. I havent found there to be any difference in accuracy from a factory grind. Its super fast and easy to use too. Downsides are the fixed point angle you can change it only by buying new wheels and the chatter prone chuck for small drills. The 2 larger chucks are fine and are what

we use the most anyway. At that time it was a current model. Anyway, a good machine, well worth the money I paid. Practical Machinist is the easiest way to learn new techniques, get answers quickly and discuss common challenges with your peers. Freight Shipping Calculator Fill out the fields below and press the orange button to get instant rates. It takes a moment for the calculator to load a quote. The carrier that is presented in the quote may not necessarily be the one used at the time of shipment. I do not see any damage. No breaks, no welds and no personal ID marks. All I have is what you see pictured and the pictures are of the actual item being sold. I bought it second hand. Wheel looks good. Check the pictures for all the attachments. It comes exactly as seen.

I am not sure if everything is there or not. So please, check photos and ask any questions. UPS ground shipping to highest bidder But item will ship from our Irwindale, CA warehouse. Bidding starts at a dollar with no reserve. Light works but will come without bulb. In good condition. Please ask if you have any questions. Please keep shipping charge in mind when bidding. Unit is fairly heavy and awkward. I will take pedestal apart to ship. With Stand, Base, Light, and numerous attachments all in great condition. This machine was lightly dusted for photos and looks great. With an actual cleaning it would look fantastic. All parts work properly and it comes with numerous

attachments. The light works but will be shipped without a light bulb to avoid breakage. Unit powers up and runs amazingly smooth and quiet. No vibration. No bearing noise, etc. Looks and runs great. Any and all reasonable offers will be carefully considered. Unit will be shipped via USPS and will be packaged securely to ensure safe and undamaged delivery. Thanks for looking! Clearance angle from 0 to 30 degrees. Nine different point styles including split points. Chamfered and helical S points. Bidding starts at a dollar with no reserve. All of the equipment at the facility was very well taken care of and highly maintained. We have shown some pictures at the bottom of the description of the shop. And as you can see it was very well kept. Photos were taken on location. The solid design eliminates the possibility of human error. Instructions are located on the machine making everyone, including entry level employees, a drill sharpening expert. The SP2500 makes 135 degree split points. Split points are selfcentering and require less torque and thrust in hand or machine drilling. Split points are excellent for CNC equipment. Its no easy task to sharpen drills by hand or with complicated machinery Thats why the SP2500s simplicity and convenience will benefit you.

Reliable Tool currently has a large selec Have used with great success and have saved thousands of dollars on both wood and metal bits. When I figure it out.
